

## Compressed Air Treatment for Every Application

## Comprehensive design know-how

Compressed air supply systems are often highly complex and can only be efficiently operated in the long term if careful planning is implemented during each stage of design, system expansion and modernisation. KESS (KAESER's Energy Saving Service)

to meet all of your compressed air requirements. The service combines proven compressed air components, user advice & services with cutting edge technology to ensure maximum efficiency – KAESER air systems typically operate at 95 percent load

reliable, quality compressed air at the lowest possible cost. This standard is achieved with products of the highest quality and through decades of experience in design and construction of compressed air systems. Use this expertise to your advantage and let

provides comprehensive analysis of your compressed air usage, enabling KAESER's experts to plan and design a system that is specially tailored

capacity or more. Every KAESER compressed air system illustrates KAESER's continued commitment to producing application-specific,

KAESER design your compressed air system.
